

Alzheimer's Advanced MasterClass

📅 Module 1: 11 - 12 Nov 2021, Module 2: Approx 6 months after Module 1

📍 Halifax Hall, Sheffield University Campus

Who is the course for?

Designed for those who already have a strong understanding across all forms of dementia, but who are looking to become 'clinical and research leaders in neurodegenerative diseases' this is an in-depth course for dementia specialists.

How is the course taught?

This MasterClass is taught as two modules. Our programme will include advanced aspects of diagnosis, neuroimaging in AD, cognitive assessments, clinical trials, the global development perspective, the use and development of fluid biomarkers, the state of the art in cognitive assessment and more.

We aim for people to come to debate the cutting edge in Alzheimer's disease and immerse themselves in the literature, but also to develop QI projects, research projects or even business cases afterwards. In spring/summer 2022 we'll bring our delegates back to present posters on their work and award a prize for the best. Delegates must complete all aspects of module 1, the inter-module project, and module 2 to gain their certificate.

Costs and accommodation:

The MasterClass costs £420 (incl. VAT), which includes all meeting materials and meals for both modules. Delegates are responsible for their own travel costs.

How do I apply?
